*Field peas put nitrogen back in the soil, reduce fertilizer cost, increase yield per acre, develop beneficial crop rotations, and break weed cycles.*

***Montech** Yellow Field Peas are selected for erect plant growth which results in harvest ease. Along with high-yields, these traits make the Montech pea lines some of the best available in today's marketplace. These lines are able to be straight combined with a non-shattering production trait in the variety. The Montech pea lines enable producers to have a valid crop alternative which benefits soil health .*

### **Montech 4152**

Yield: Excellent  
Maturity: Medium  
Height: Tall  
Harvest Ease: Excellent  
Lodging Score: Excellent  
\*Seeds/lb: 1950-2200  
Disease Res: Good
