Turbocharge Your Soybean-Corn Rotation
Increase Carbon, Sunlight and Revenue

A New Workshop & Field Lab Approach
September 13

McDonald Farm, 944 S. 8th Road, Douglas, NE 68344 (1/2 mile south of Douglas by the tents).
A 105 a. field to build carbon & save moisture in traditional soils through new steps in southeast NE.

Jimmy Emmons
Leedey, OK
Watch his story here
Watch his 2018 NTOP Keynote

Recognized for conservation practices and land ethics on their diverse 2,000 acre farm and 6,000 acre ranch, Jimmy Emmons and wife, Ginger, are the inaugural Leopold Conservation Award winners for Oklahoma (2017).

Focusing on soil health principles and storing water on cropland and rangeland Jimmy has improved his bottom line. Learn about the system it takes to build carbon and revenue.

We will explore soils using magnifiers and digital means. Through hands-on steps, you will gain practical knowledge to examine your soil biota, guage economic returns and improve your operation.

Featuring
Jimmy Emmons

Noon - 12:30 Registration and Check-in at field site for free materials for workshop. *Snacks provided but no lunch.

12:30 - 2:00 PM -Workshop & Learning under the tents
Jimmy Emmons - A System to Build Carbon & Revenue
Jimmy Emmons and Candy Thomas, (KS-NE Regional Soil Health Specialist) - Understanding and applying digital scopes to examine your soil

2:00 - 3:30 PM Field Stations
Station 1: Soil Pit with Candy Thomas - Underground Rhizosphere: Lets look at the roots, nutrients, carbon, and Play with soil livestock. Use the magnifier to apply to your field.
Station 2: Jimmy Emmons - Let's Investigate the Above Ground Rhizosphere and Nutrient Enhancement to Increase Returns: plant tissue, nutreints, weeds, pollinators and BRIX.

3:30 - 4:15 PM Tie Carbon, Nutrients and Health - Jimmy Emmons and local producers - next steps forward.

Register now at www.notill.org
to secure your free magnifier!

$25 pre-registration by 9/6 guarantees materials and magnifier. After 9/6 registration cost $35
