ENHANCER II is a forage yield leader with an outstanding disease and nematode resistance package. It exhibits high relative forage quality which will produce dairy quality forage for the demanding dairy operations. **Enhancer II** expresses high resistance to the six major diseases that attack alfalfa.

KEY FEATURES

- ◆ Higher Forage Yield Potential
- ◆ Improved digestibility for better animal performance
- ◆ Fast recovery with excellent persistence.

Agronomic Traits

Bacterial Wilt	HR	Winter Survival	1.6
Fusarium Wilt	HR	Fall Dormancy	4.0
Phytophthora Root Rot	HR	Stand Persistence	Excellent
Verticillium Wilt	HR	DRI	30
Anthracnose (Race 1)	HR		
Aphanomyces Root Rot (Race 1)	HR	Drought Stress	Excellent
Nothern Root- knot Nematode	HR	Growth Habit	Upright
Stem Nematode	HR	Fineness of Stem	Fine-Medium
Pea Aphid	R	Cutting Recovery	Very Fast
		Leafiness	V. High Leaf to Stem
		Forage Quality	Exceptional
		Wheel TrafficTolerance	Very Good
