

# Technical Data Sheet

**ARROW SEED CO., INC.**

**PO BOX 722  
BROKEN BOW, NE 68822**

**Phone: 800-622-4727**

**Fax: 308-872-6945**

## ***E Z GREEN GLSR* Perennial Ryegrass Blend**

26.6%	Aspire Perennial ryegrass
26.6%	Grand Slam 2 Perennial ryegrass
26.6%	Karma Perennial ryegrass
20%	Fiesta 4 Perennial ryegrass

### Seed Quality Specifications:

Minimum Purity: 97.0%  
Minimum Germination: 90%  
Maximum Crop Seed: 1.0%  
Maximum Weed Seed: 0.01%  
*Experimental Quality Only*

### Characteristics & Use

- Excellent summer density keeps the ball on top of the turf
- Strong brown patch and dollar spot resistance
- Awesome low mowing tolerance and mowing quality
- Excellent traffic and wear tolerance once mature
- Suited for use on golf course fairways, football fields, baseball and softball diamonds, and home lawns.

### Establishment & Cultural Practices

#### Establishment:

- Germination in 5-10 days
- Seeding rate: 6-10 lbs./1,000 sq. ft. or 260 to 435 lbs. /acre. Good overseeding results can be achieved by broadcasting seed.
- For best germination results, seeding should be after soil temperatures reach 45 degrees Fahrenheit. As with all newly seeded areas, good seed and soil contact, as well as adequate moisture, is required for successful germination and establishment.

#### Cultural Practices After Establishment:

- Mowing: adapted to range from ½ inch to 1 ½ inches; optimum fairway height 7/16 to 3/4 inches.
- Fertilization: 2 – 4 lb. Nitrogen per 1,000-sq. ft. per year. Optimum dependent on soil type, mowing height, irrigation regime, and turf quality expectation.
- Irrigation: Applied as needed. Deep, infrequent applications are encouraged to maintain a healthy root system.
- Fungicides may be required to maintain top quality turf.
